

# Closing remarks

Roger Cooke

# THANKS!

- To support staff
- To all participants
- To all reviewers
- To all authors
- To LSRO

- The Chemicals
  - Real chems, real data, ‘as clean as it gets’
- The question:
  - for  $d: d_1 < d < d_h$  what is the uncertainty in response a dose  $d$  for  $N$  fresh rats?
  - How to decide?
  - Uncertainty quantification: objective science or invasion of privacy?
- Follow-on questions:
  - Extrapolation to humans
  - Use of ‘field data’
  - Use of expert judgment

# Follow-up

- Anyone: please contribute written commentary on papers, or discussion topics
- Get others – i.e. not model developers – to use methods and share insights
- Put software on website, encourage proliferation
- Put other ‘recalcitrant’ data on website, get students to use these tools.

# Publication

- Book in rff press?
- Special issue?
- RFF report?

# Publication

- Graphs in black-white
- Gather all reviewer and other comments.
- Herding cats, agree on DEADLINE
